8/7/2022	Friday					$ 1,070.59																$ 134.00

#1

New Trade

If there is currently a trade that is still open, and you want to open another trade, you will need to manually adjust the account once you close that trade. This is to ensure that the amount that was deducted from the account whilst that trade was open (Cost to enter/margin) as well as the PnL is added to the account balance once the trade is closed.
In the above example, Trade #1 was still open, whilst another 2 trades have been opened and closed. Once Trade #1 was closed, you will see a red box appear under the column heading "ADUSTMENT TO ACCOUNT BALANCE" (#2). Take this value, and manually enter it into the "ACCOUNT ADJUSTMENT" Column (#3) in the same row as the new trade you are about to open.
The reason it is important to add in the adjustment is because it will add in the amount that was originally withheld to keep that trade opened (margin) + your PnL and will use this to calculate the position sizing for your new trades. If you don't reconcile this, then the account balance and position sizing calculations will all be incorrect.

If the adjustment to the account balance value is negative (#2) , then you want to adjust the account (#3) with a positive value, and vice versa.

The Available Account Balance = Account balance minus the cost to enter a trade, if the trade is not closed before you open another trade.
Current Account Balance = Initial Account Balance + Actual PnL.

When 2 or more open trades are closed on the same day

DATE OF ENTRY	DAY	DATE OF EXIT	DURATION IN TRADE (DAYS)	TRADING PAIR	LONG/ SHORT	AVAILABLE ACCOUNT BALANCE ($)	% RISK OF ACCOUNT	LEVERAGE	ENTRY PRICE	STOP LOSS PRICE	TARGET TAKE PROFIT	TARGET R:R	ACTUAL EXIT PRICE	POSITION SIZE (USD)	POSITION SIZE (BASED ON COIN)	COST TO ENTER	ACTUAL PnL ($)	ACTUAL PnL (%)	ACTUAL R:R	HYBLOCK DELTA (POS FOR LONGS, NEG FOR SHORTS)	ADJUSTMENT TO ACCOUNT BALANCE ($)	ACCOUNT ADJUSTMENT
30/6/2022	Thursday	8/7/2022	8	BTCUSDT	Long	$ 1,000.00	1.00%	10	$ 19,800.00	$ 19,600.00	$ 20,500.00	3.50	$ 20,500.00	$ 990.00	0.05000	$ 99.00	35.00	35.35%	3.50		-134.00	
1/7/2022	Friday	8/7/2022	7	BTCUSDT	Short	$ 901.00	1.00%	10	$ 20,600.00	$ 20,800.00	$ 19,600.00	5.00	$ 19,600.00	$ 928.03	0.04505	$ 92.80	45.05	48.54%	5.00		-137.85	
3/7/2022	Sunday	7/7/2022	4	BTCUSDT	Short	$ 808.20	1.00%	10	$ 20,500.00	$ 20,700.00	$ 19,600.00	4.50	$ 20,700.00	$ 828.41	0.04041	$ 82.84	-8.08	-9.76%	-1.00			
9/7/2022	Saturday					$ 1,071.97																$ 271.85

When two or more previously opened trades are closed on the same day, you will follow the same steps as above. The only difference is, you will sum the total adjustment for that closing date and add that to the next trade you open.

= 134 + 137.85
