FINAL DAMAGE

FINAL DAMAGE M

Final Damage M

These are seen when the MM hasn't had enough commitment from retail traders to reverse price. This allows them to pick up more contracts before making the move. Sometimes there will be a large Tradinglite/ Hyblock Heatmap level just above the first peak and this will be the hint it's coming.

These will only be seen at level 3

FINAL DAMAGE W

Final Damage W

Retail traders enter a position on the first peak of the W and this move stops them out before shifting out quickly and moving in the intended direction
